

# Darwin Falls: Road Closure

*Exerpts from Justin's field notes*

**Date:** 7-29-02

**Weather:** Sunny and warm but very comfortable

**Mood:** I felt peppy

**Our finished project.**

**Objective:** We were to close a road where uneducated people drove into a wash. This closure should help restore the wash to its original state.

**Description of Work:** We dug pits, planted vertical mulch, and moved rocks to remove traces of a closed road.

I felt the project was a huge success because we camouflaged the road to the point where any sane person wouldn't drive in it. We also enabled it to return to its natural state more quickly.

**The crew at the falls.**
